

# RC-R6 evidence map of the renderer characterization track

Each row states only what its own result established. Nothing here is evidence about the detector, the policy, or the cause of the closed D8b result.

RC-R1 geometry

## GEOMETRY DEFECT

gates not met: G3, G4 (3 arms), G7 (3 arms)

RC-R2 apparent area

## AREA MATCH FAILED

frozen scale 0.8451 gave an area ratio of 1.1899 against a tolerance of 0.05

RC-R3 shading

## SHADING\_GATE FAILED

gates not met: S3 (3 arms)

RC-R4 lighting

## LIGHTING CHARACTERIZED

every preregistered gate held

RC-R4M material

## MATERIAL CHARACTERIZED

every preregistered gate held

RC-R5 cost

## DESCRIPTIVE NO VERDICT

descriptive by design; no pass or fail threshold exists

RC determinism

## DETERMINISTIC

every preregistered gate held

**D8b frozen-policy loss (-48.967 pp, closed and preserved)**  
causality from any row above to this box: NOT\_TESTED. Shading, mesh geometry, projected area and the detector are not established as causes.
