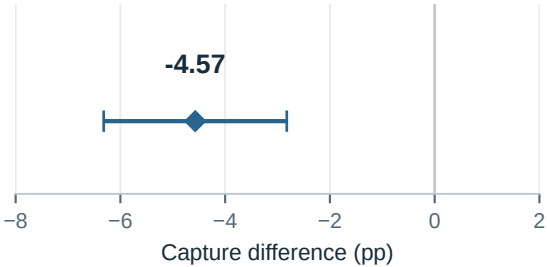
Separate experiments, separate estimands

Intervals and horizontal scales differ. These effects are neither pooled nor additive.

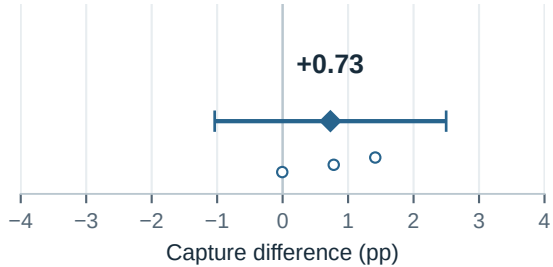
(a) Measured-error injection · policy F

Episode-level 95% CI; 2 evaluation seeds.



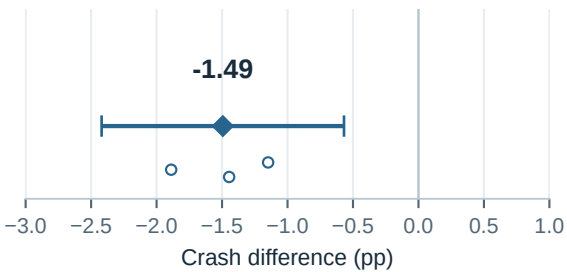
(b) Readaptation from policy F

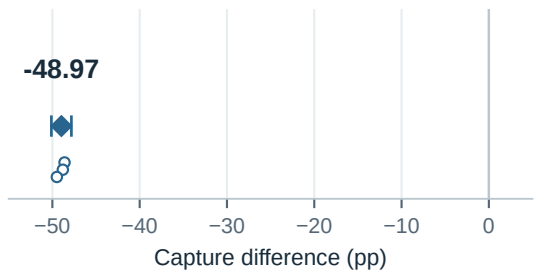
3 training seeds · t 95% CI · INCONCLUSIVE.



(c) Arc vs riskcap · policy F

Seed mean + t 95% CI; 3 evaluation seeds.



(d) Shaded mesh vs analytic · policy R


3 paired seeds · t 95% CI · cause NOT_TESTED.
